

# Creating Animation

---

**Nathan Taylor**

SOLUTION ARCHITECT

@taylonr [www.taylonr.com](http://www.taylonr.com)

“Your pages are slow for me”

Server optimization is not your job

# Loading Indicators from Other Sites

**“That would help a lot!”**

# Trigger a Transition on Click

---

# Basic Animation

---

# Looping Animations

---

# Keeping the Last Animated Frame

---

# Possible Fill Modes

None

Forwards

Reverse

Both

# Controlling How Animations Restart

---

# Multiple Animations

---

# How Did We Get Here?

---

```
border-radius: 5px;
```

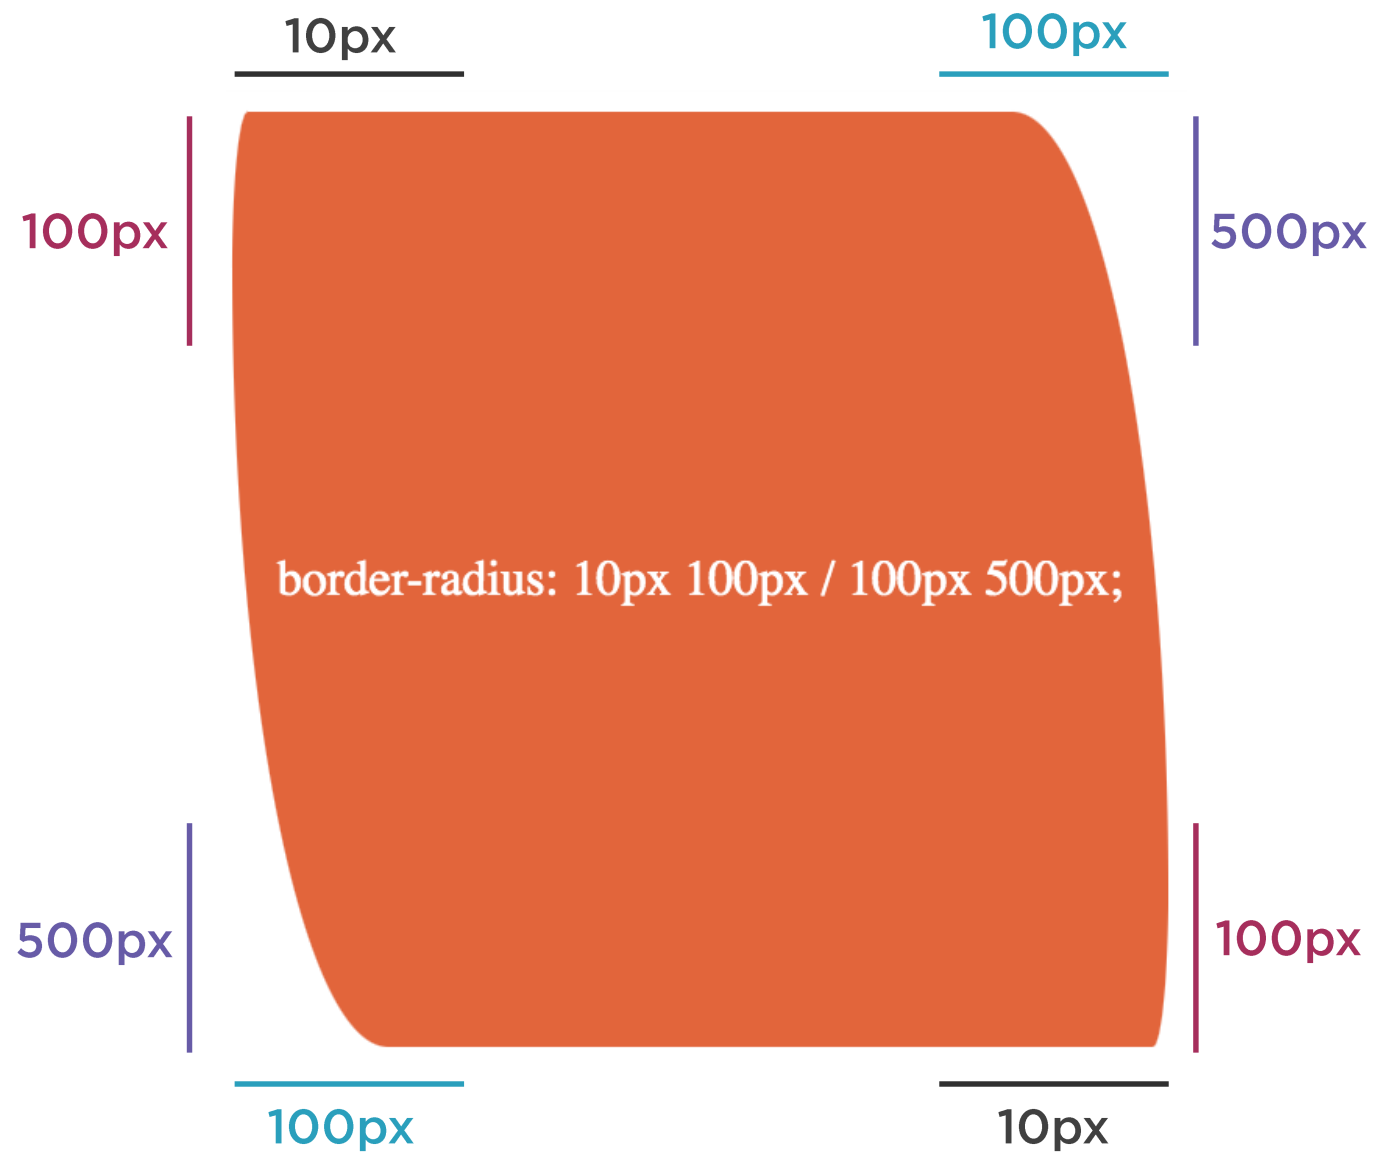

## Border Radius Shorthand

```
border-top-left-radius: 5px;  
border-top-right-radius: 5px;
```

## Border Radius

# Box Shadow Properties

x-offset

y-offset

blur-radius

spread-radius

color

inset

# Possible Transition Properties

**transition-duration**

**transition-delay**

**transition-timing-function**

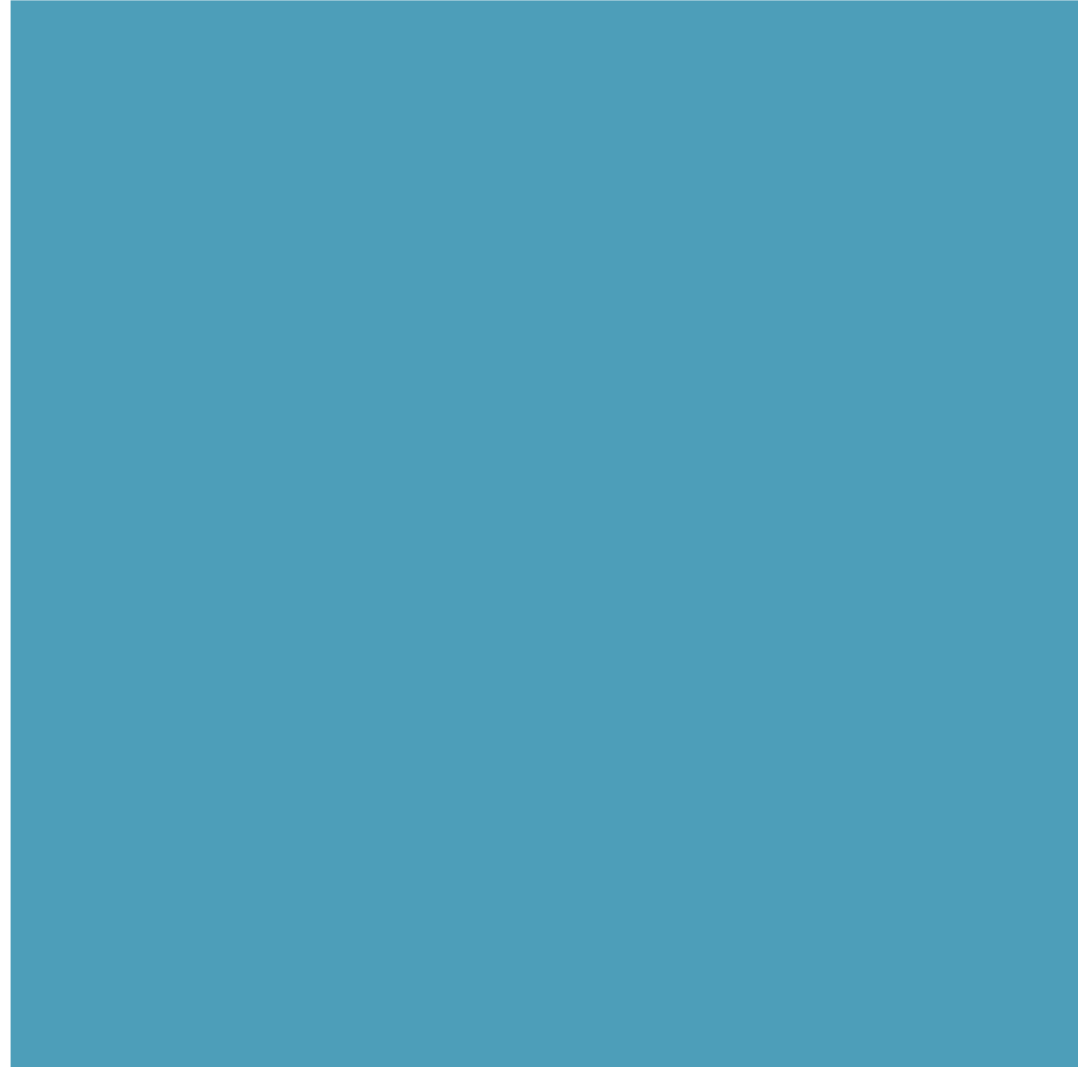

**transition-name**

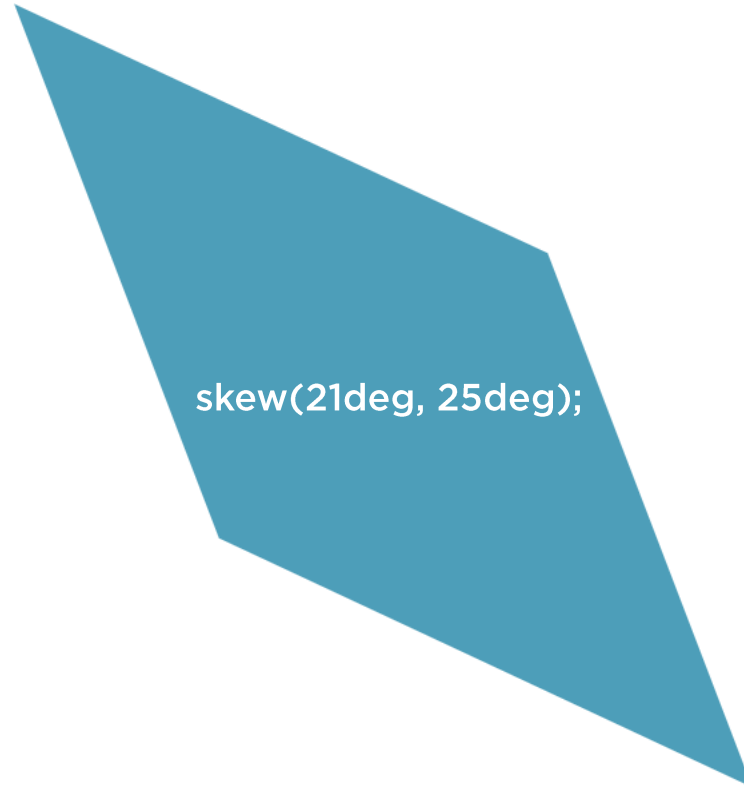

# Translate

# Scale

# Skew

`skew(21deg, 25deg);`

# Rotate

# 3D Transforms

# Animation Properties

**transition-duration**

**transition-delay**

**transition-timing-function**

**transition-name**

# Unique Animation Properties

**animation-direction**

**animation-fill-mode**

**animation-iteration-  
count**

You're only limited by your  
creativity
