This course was created by using:

- HTML 5
- CSS 3 and beyond
- JavaScript
 - ECMAScript 2022

Version Check

This course is 100% applicable to:

- HTML 5
- CSS 3 and beyond
- JavaScript
 - ECMAScript 2022

Introduction

History of the web

How the web works

Why you should learn about how it works

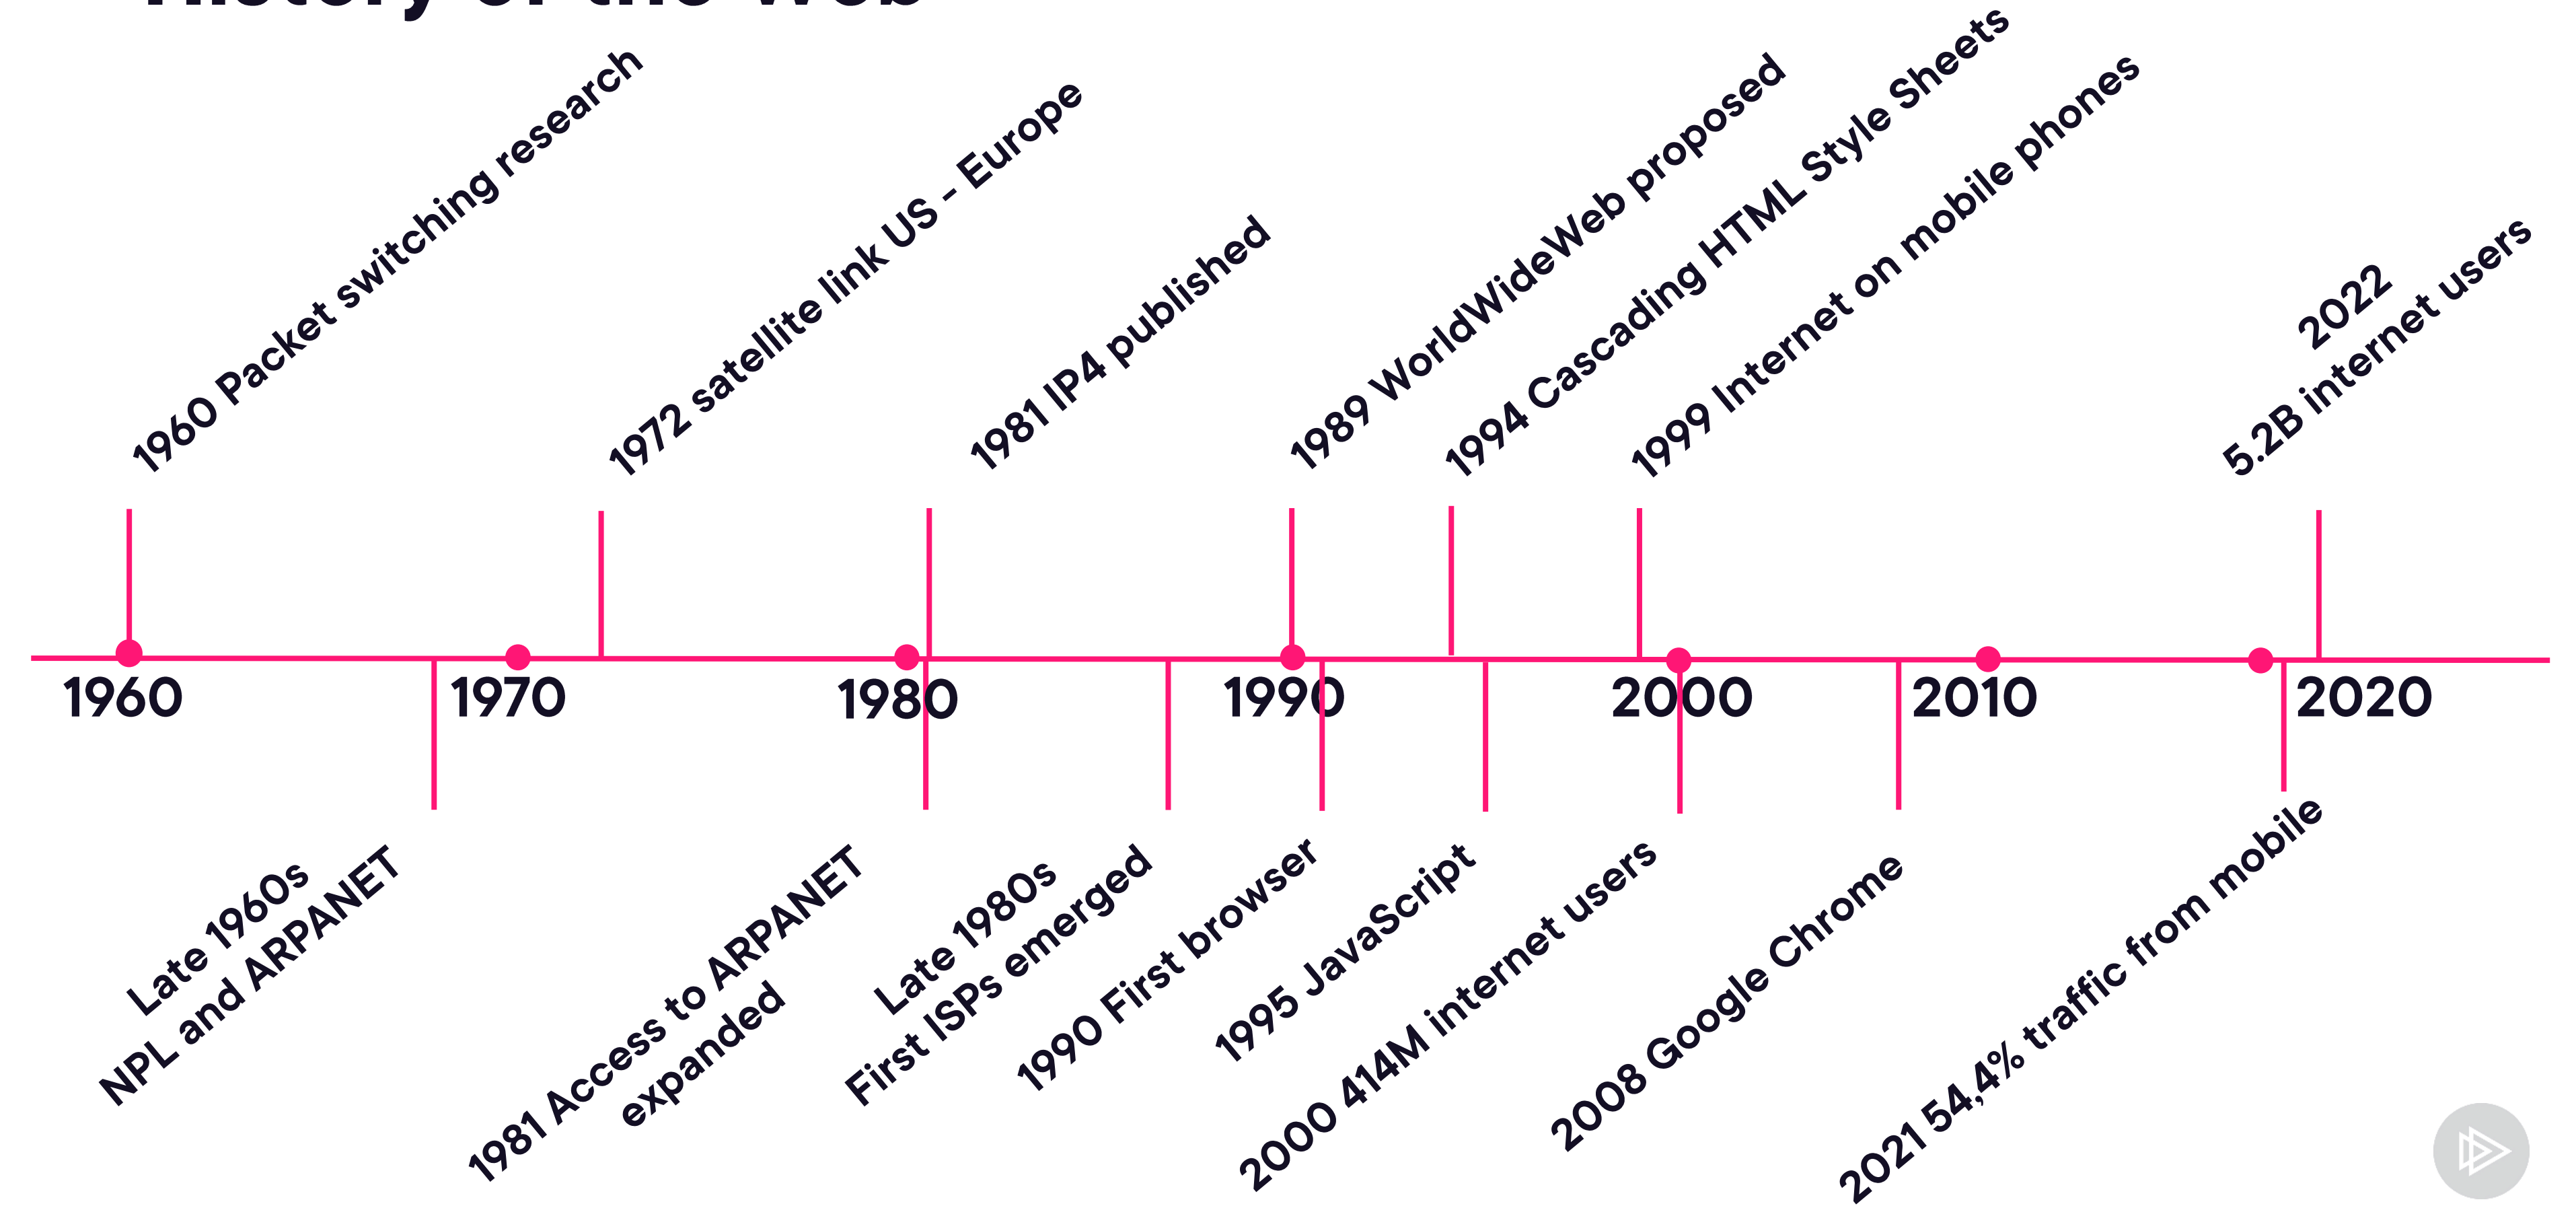

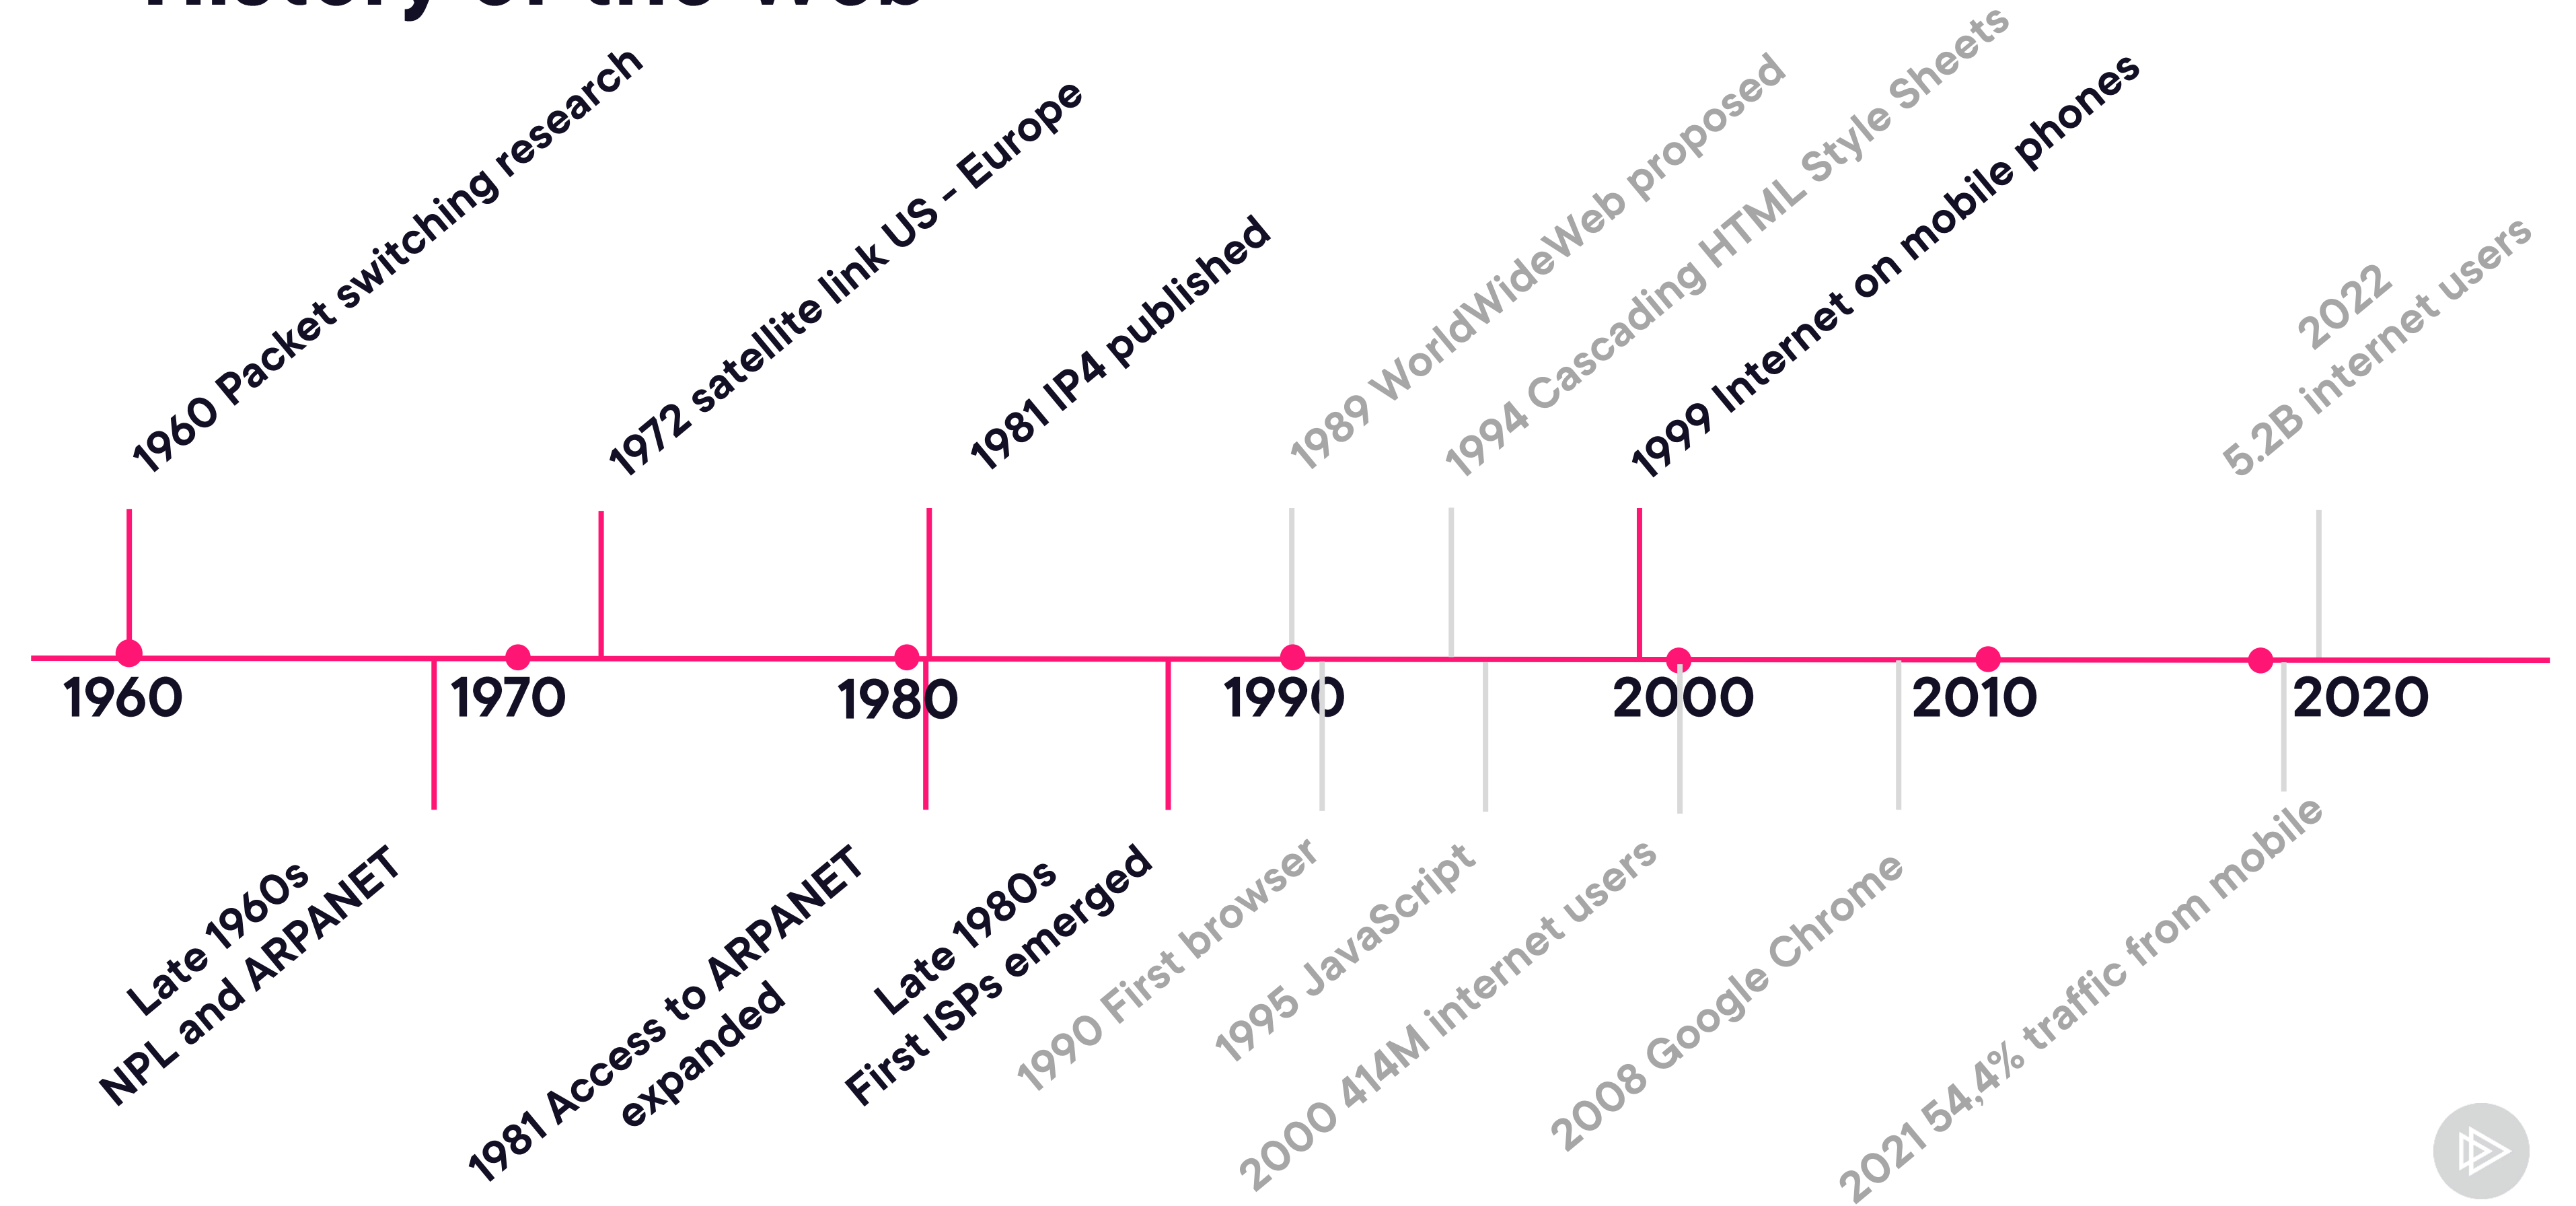

A Look into the History of the Web

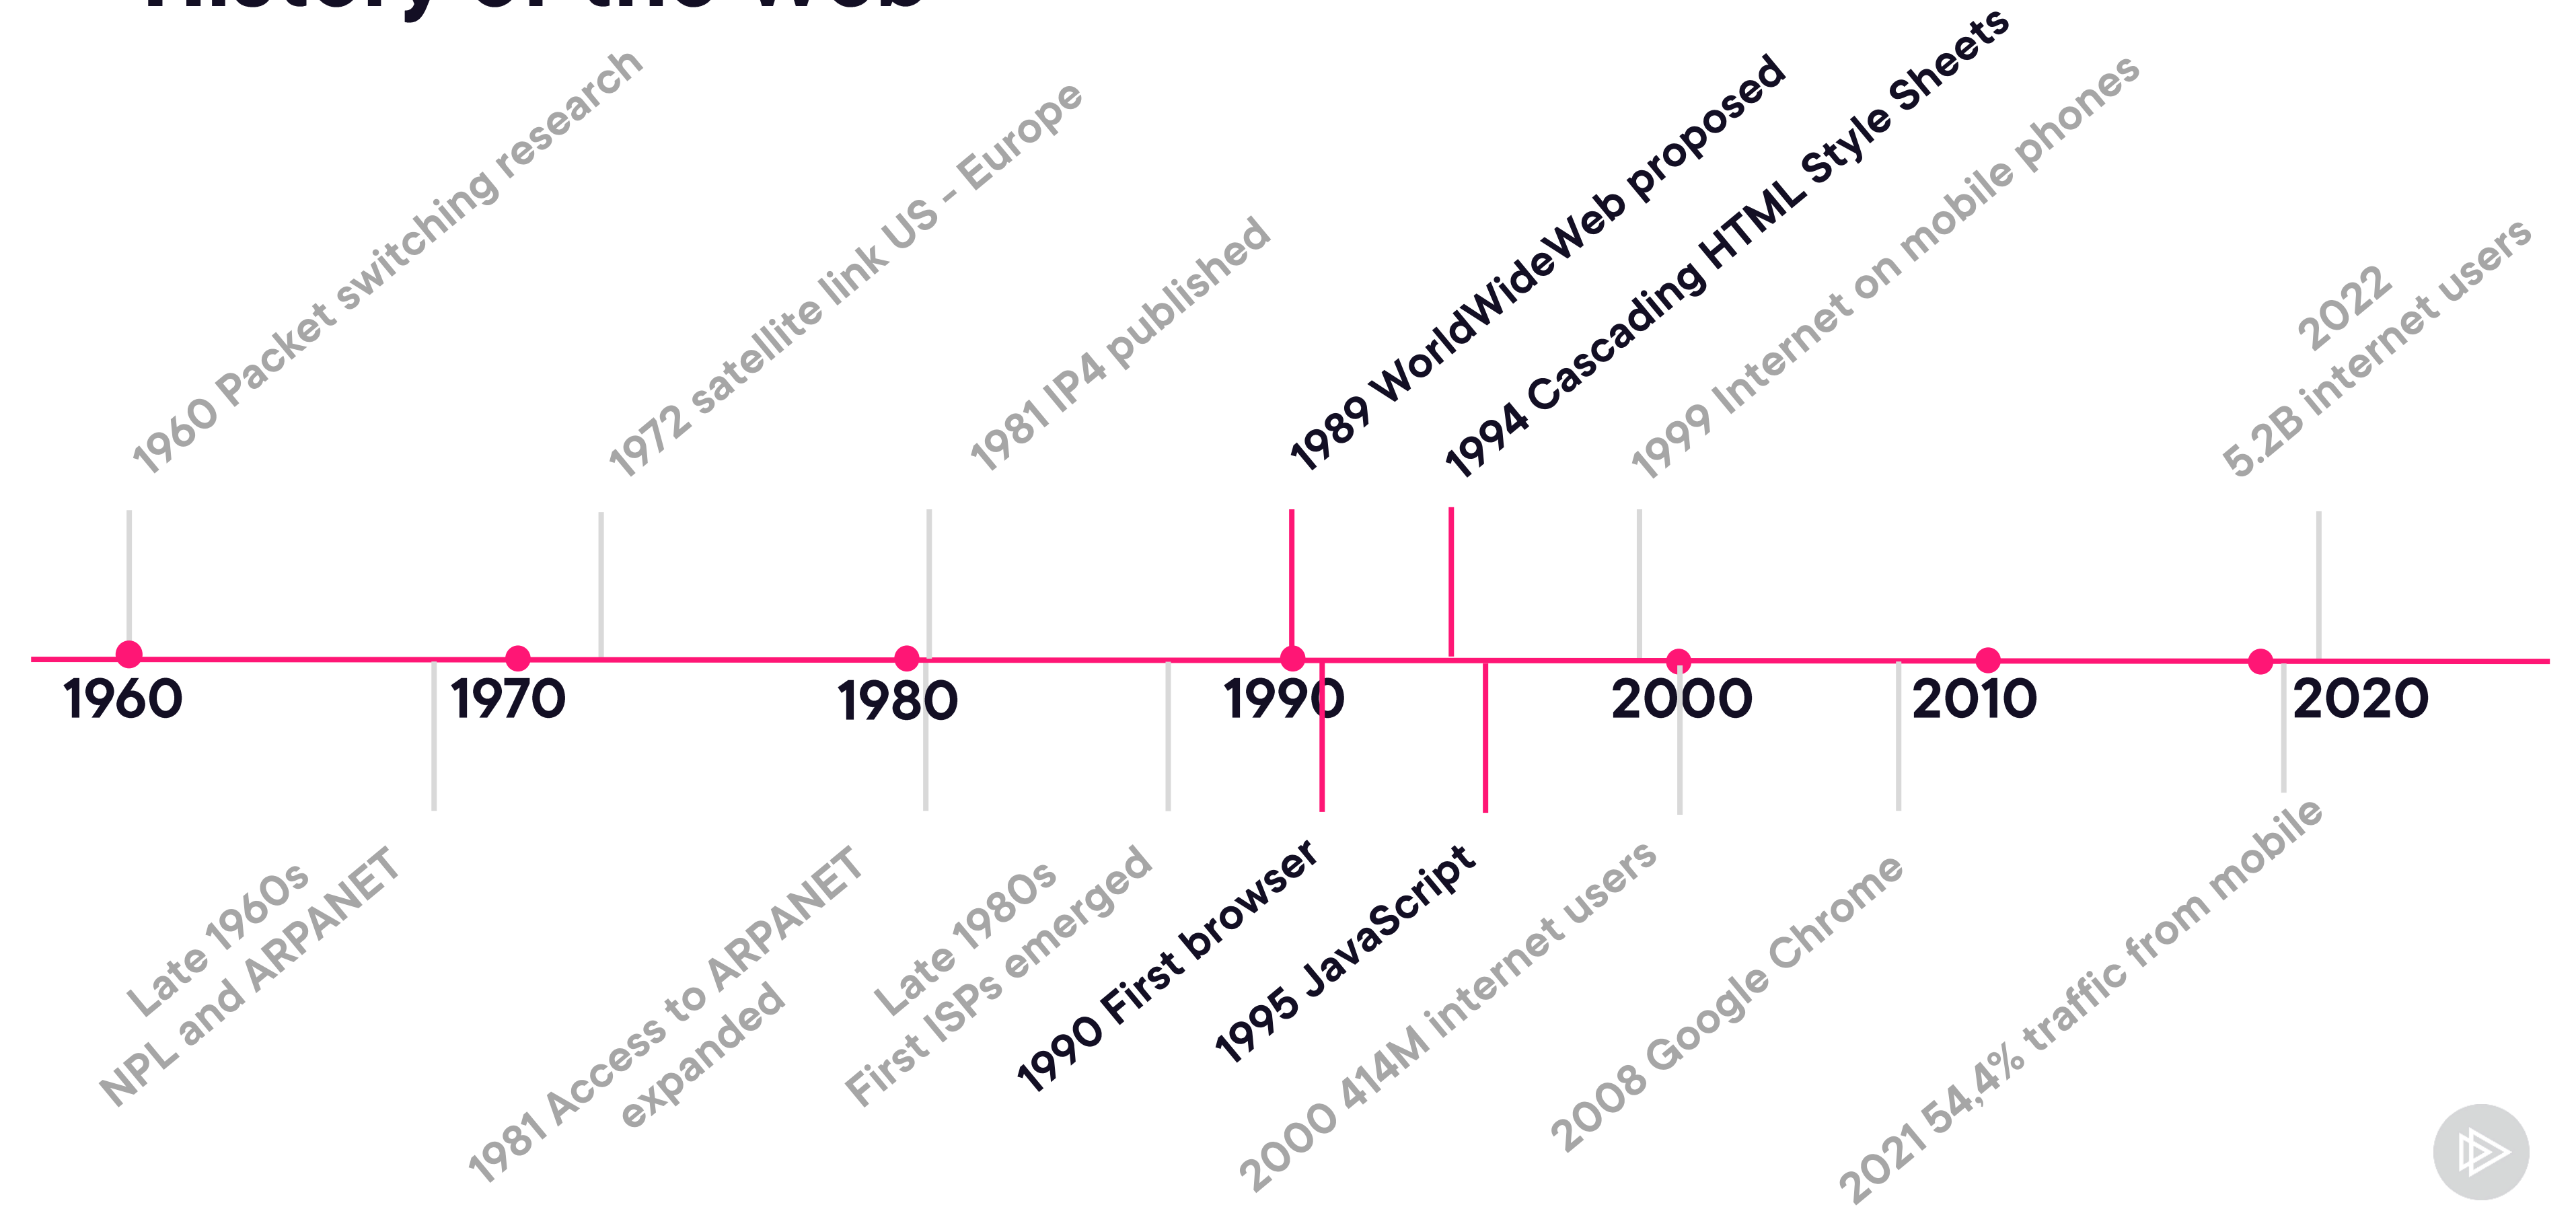

History of the Web

History of the Web

History of the Web

How the Magic of the Web Works

What Is the World Wide Web?

The World Wide Web

is an information space

where documents and other web resources

are identified by Uniform Resource Locators (URLs),

interlinked by hypertext links,

and can be accessed via the Internet.

Ingredients for the Web

Resources
(documents, images,
other files)

**Uniform Resource
Locators (URLs)**

**Hypertext Transfer
Protocol (HTTP)**

Ingredients for the Web

Clients
(Web browsers)

Document

- CSS
- JavaScript

GET
POST

URL: <http://server.com/document1.html>

Web Server

Why Learn About HTML, CSS, and JavaScript?

New to these topics

What the technologies are
Why they are relevant
How people use them

Already experienced

Reaffirm the concepts
Put the technology in context

Things to Remember

The web is possible because of the internet

- The internet has been around since the 80s
- The web has been around since the 90s

To use the web, you need:

- A web server, that hosts resources like documents
- URLs that identify those resources on that webserver
- Protocols that can be used to transfer resources
- A web browser, to view documents and use resources

Why should you learn about HTML, CSS, and JavaScript?

- **What** the technologies are, **Why** they are relevant and **How** people use them
