

Angular: Present and Future

Joe Eames

Google Developer Expert

@josepheames | joe-eames.me

Overview

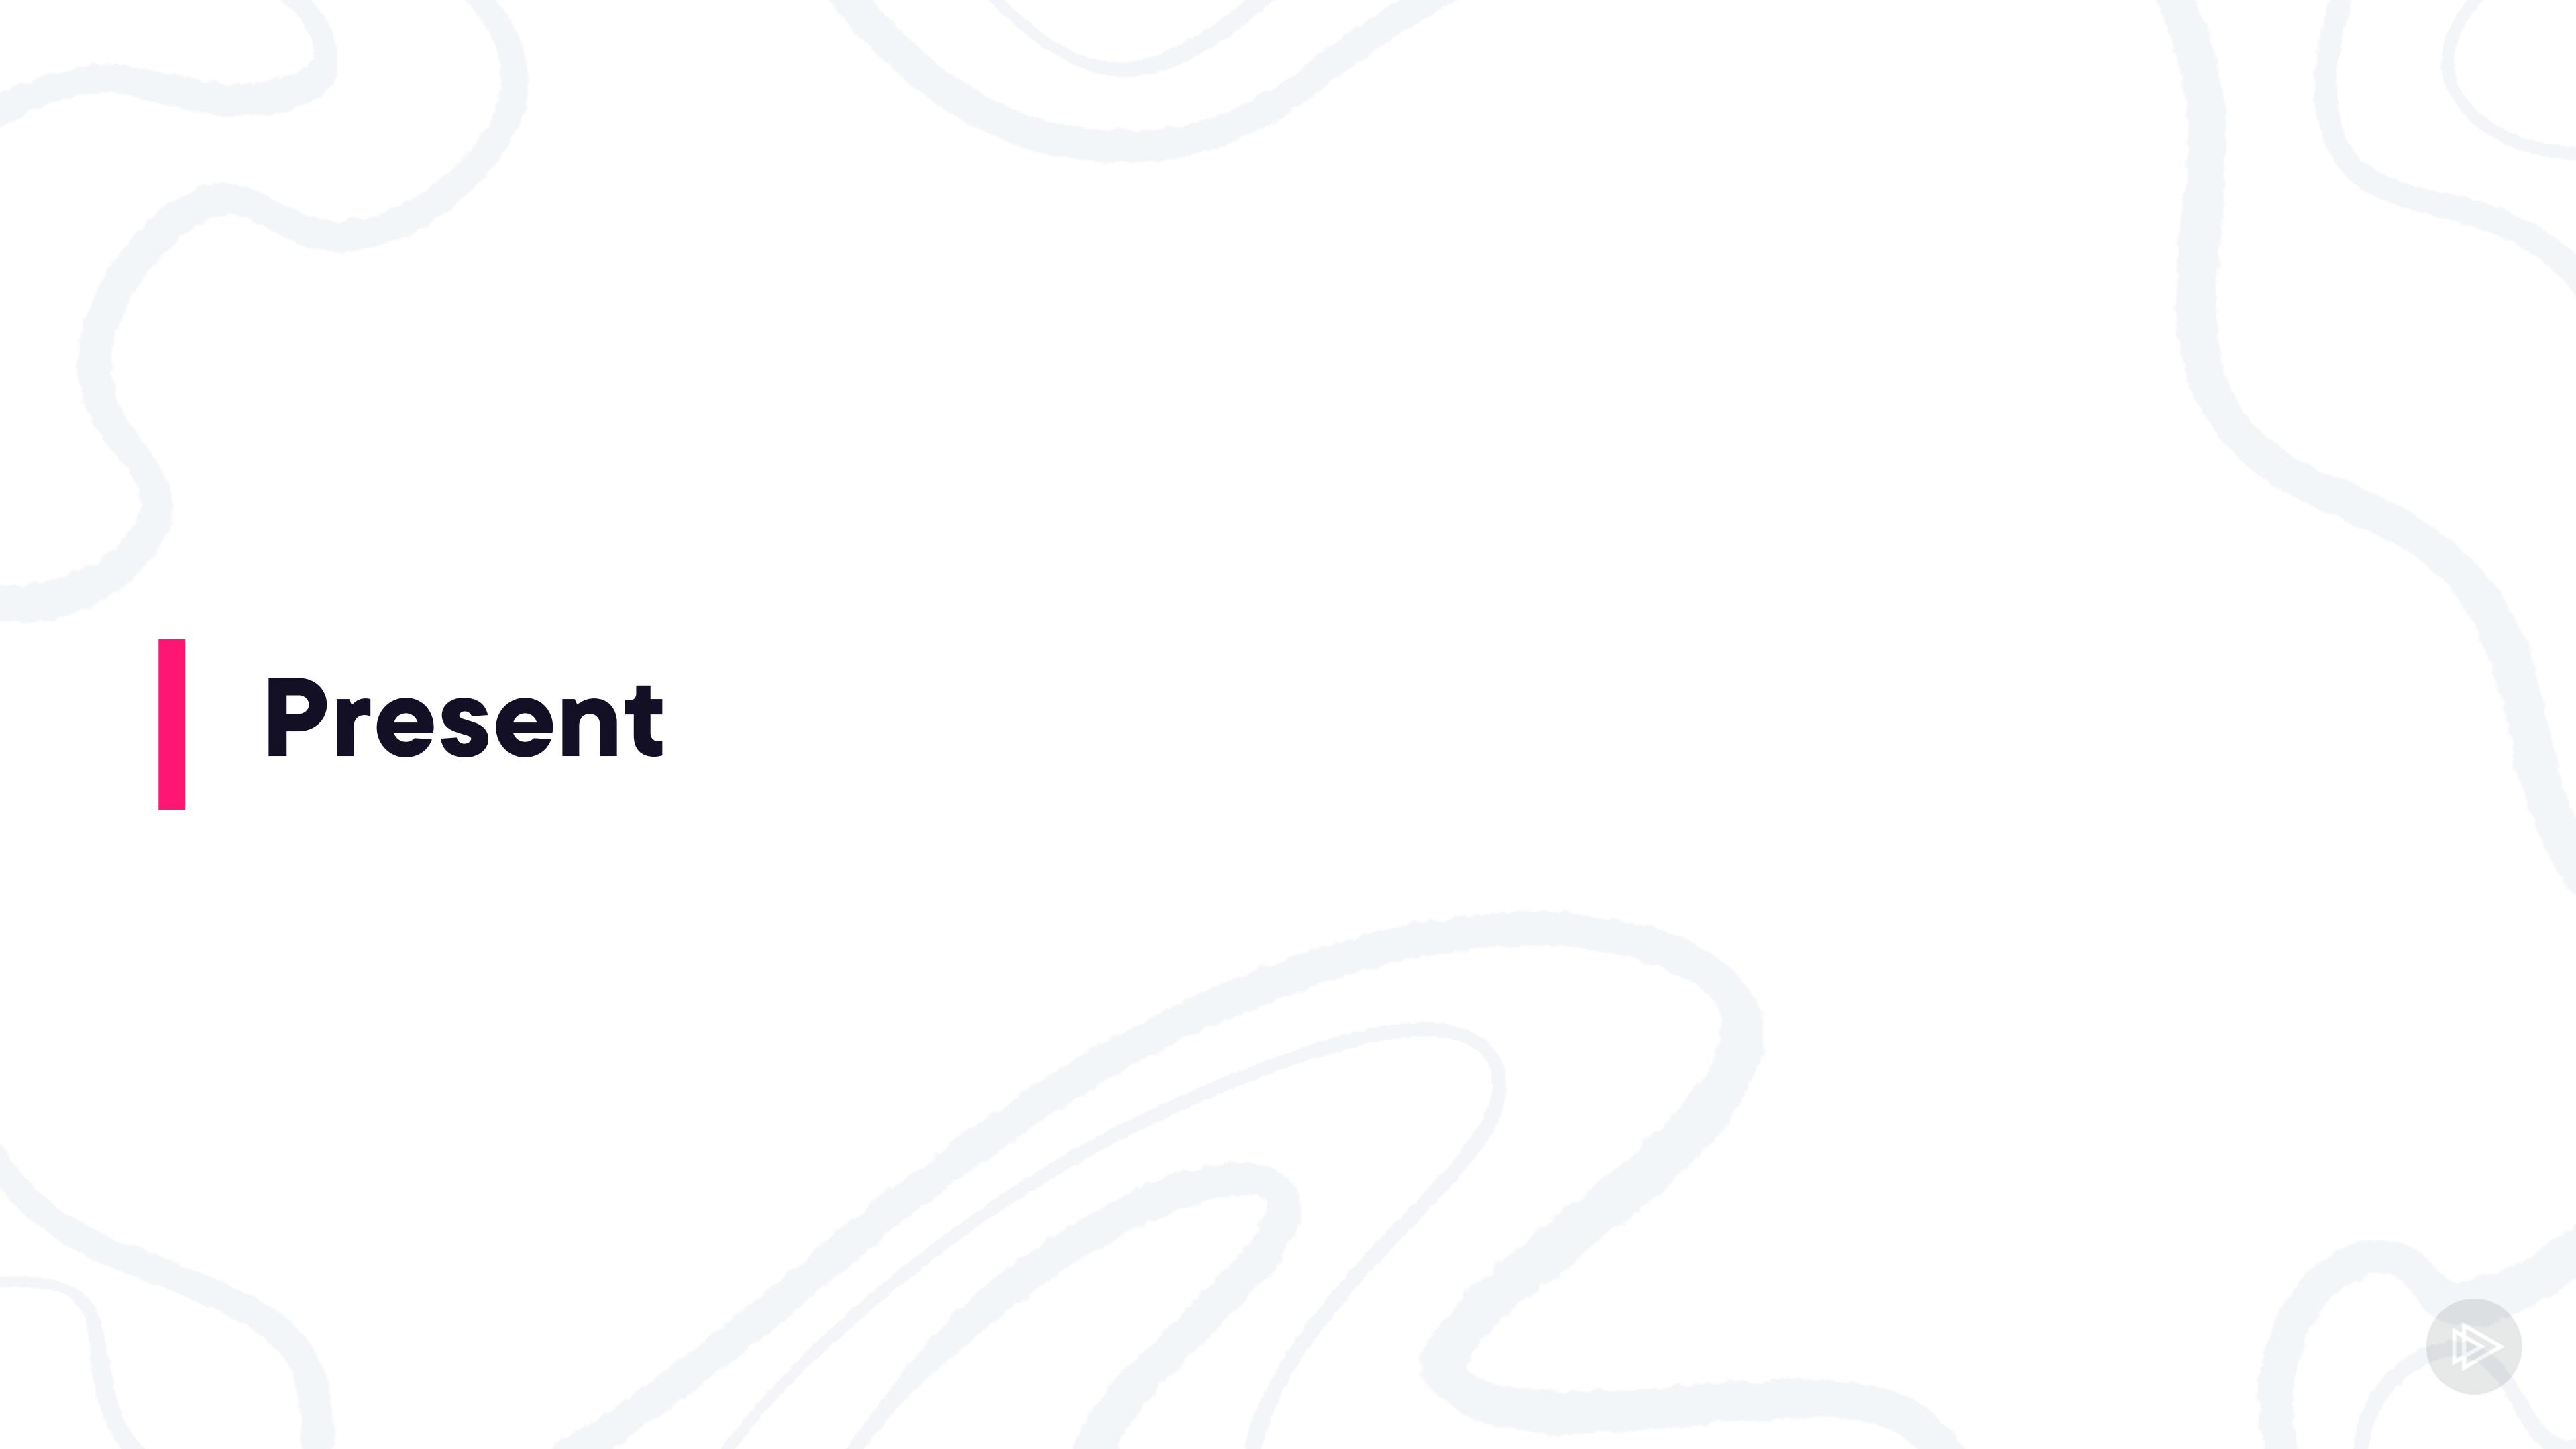

Present

Choosing a framework

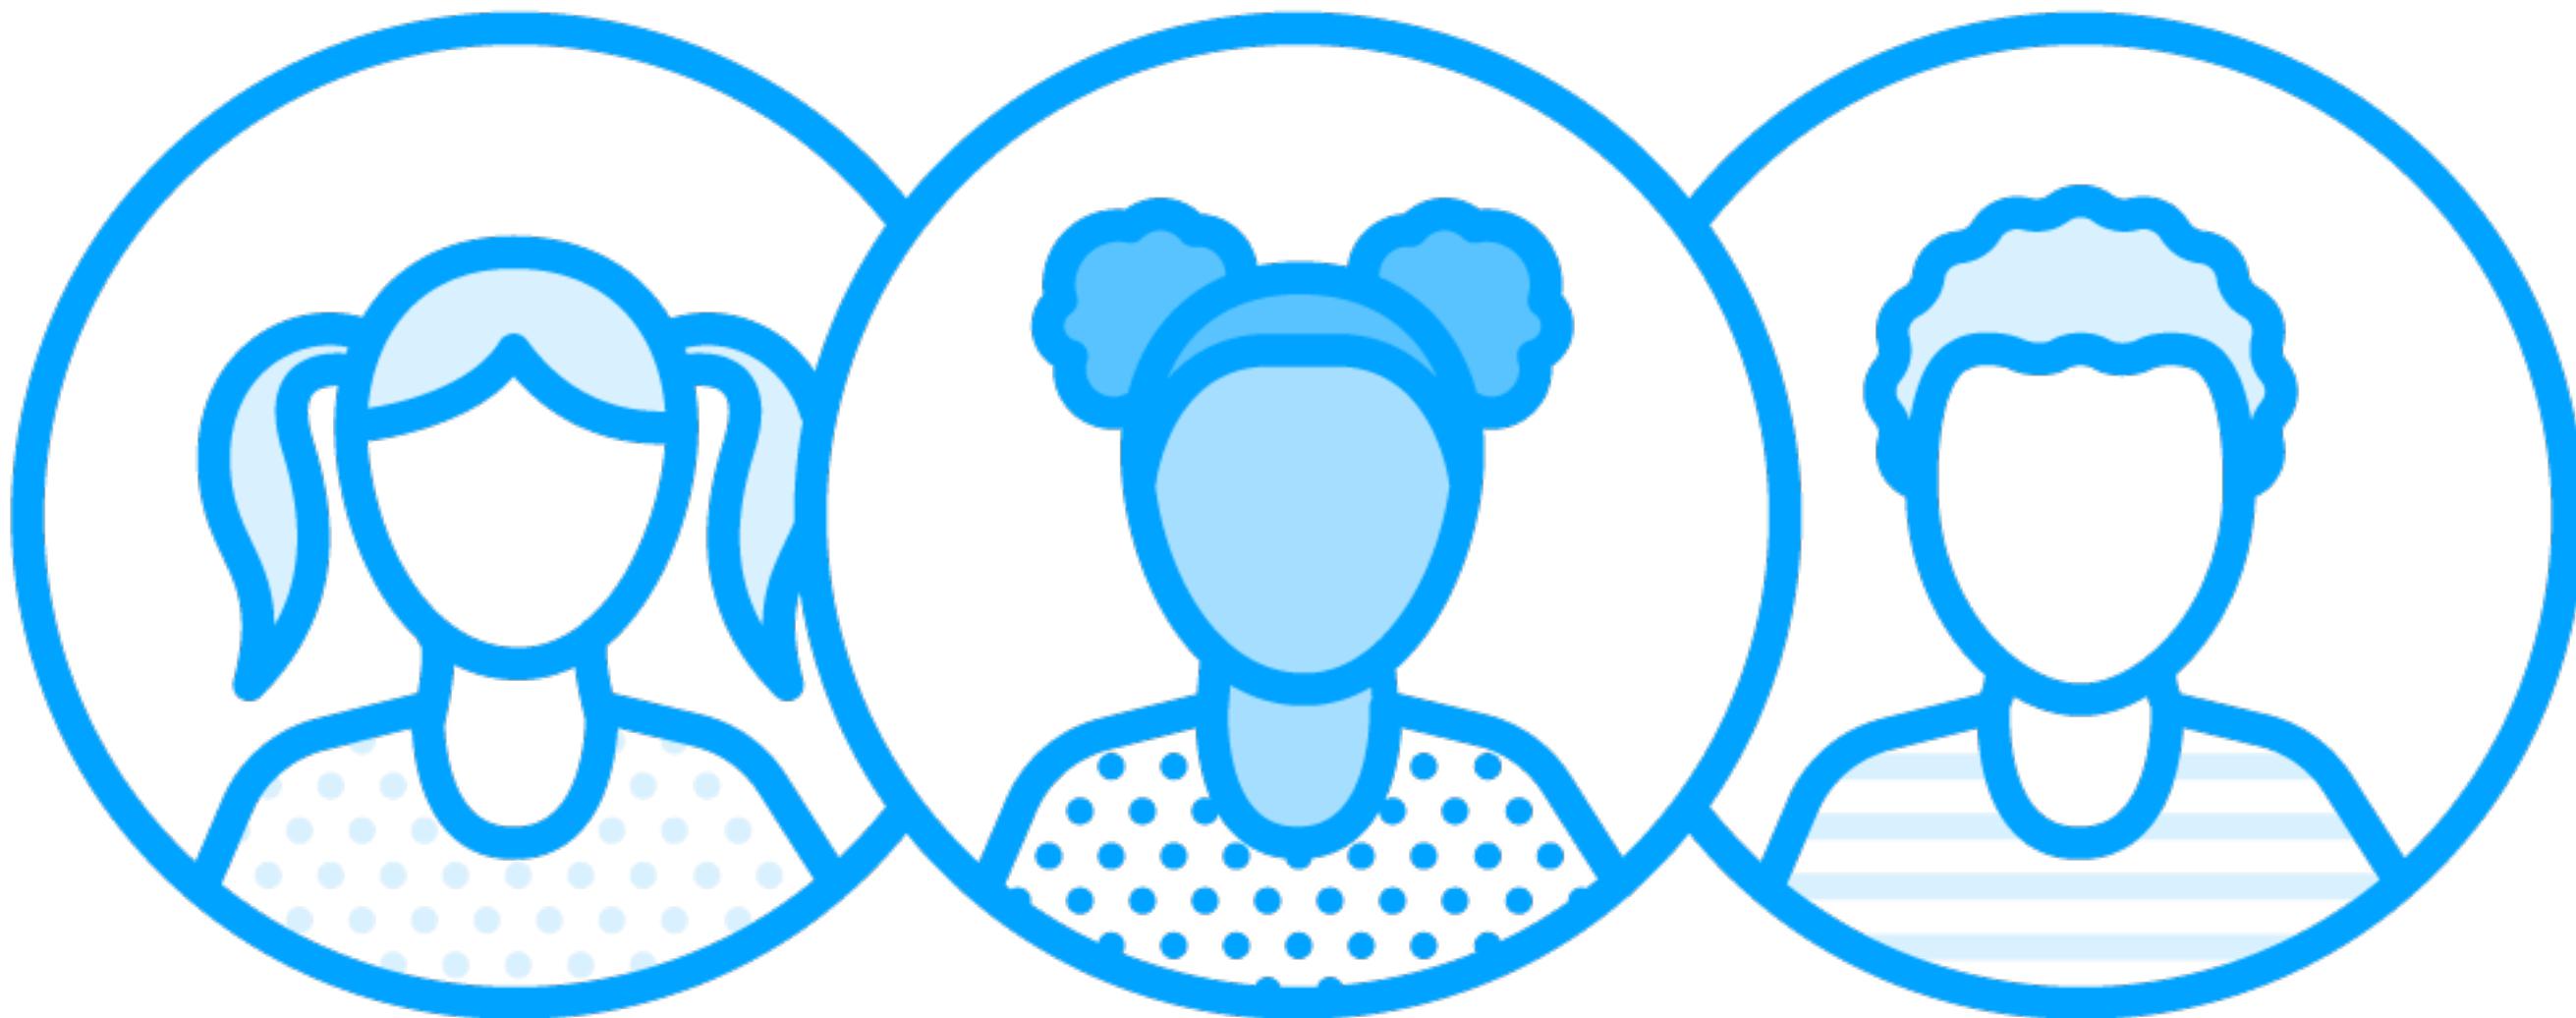

Future

I Present

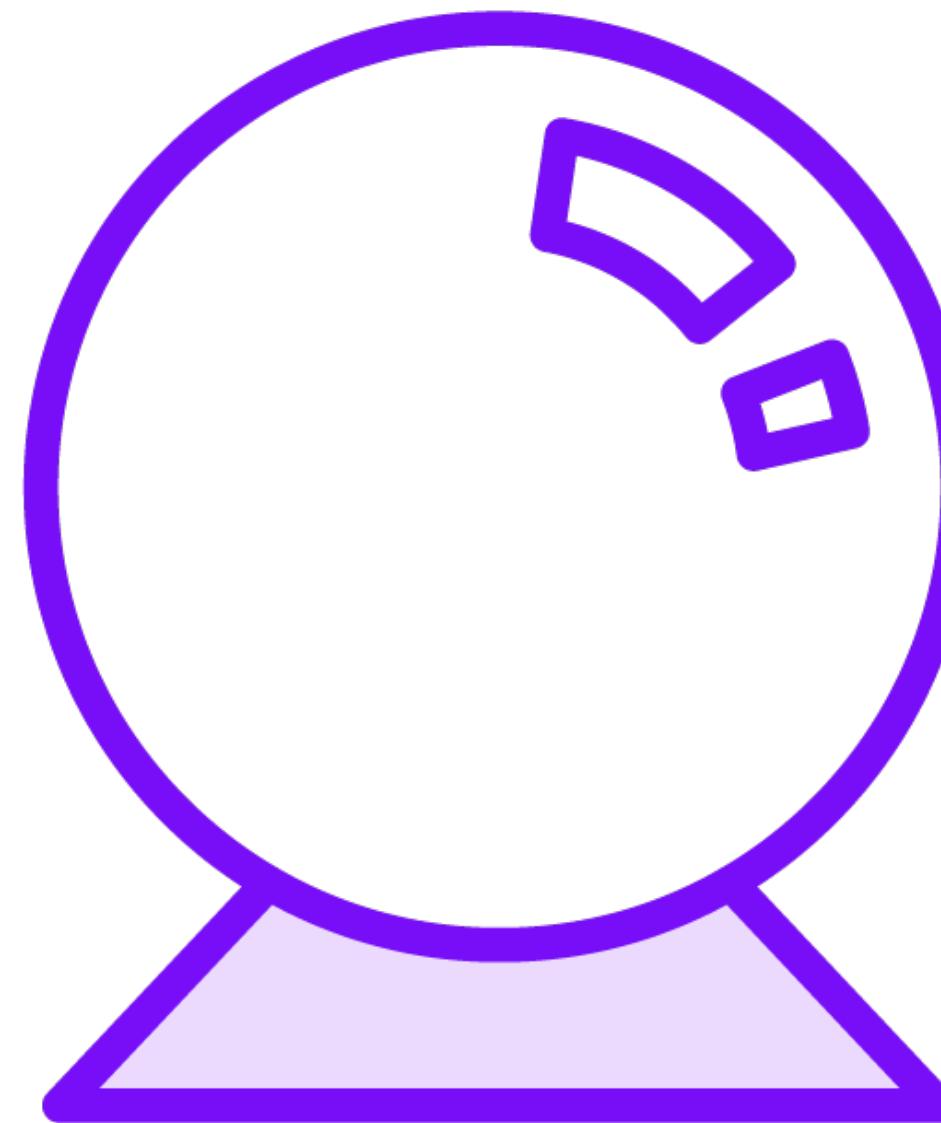

Choosing a Front-end Framework

Sorry

Factors to Consider

Technical aspects

Corporate environment

Personnel considerations

Likely future landscape

Reasons to Choose Angular

Enterprise

Typed backend

AngularJS

- XLTS.dev

Templates separate from code

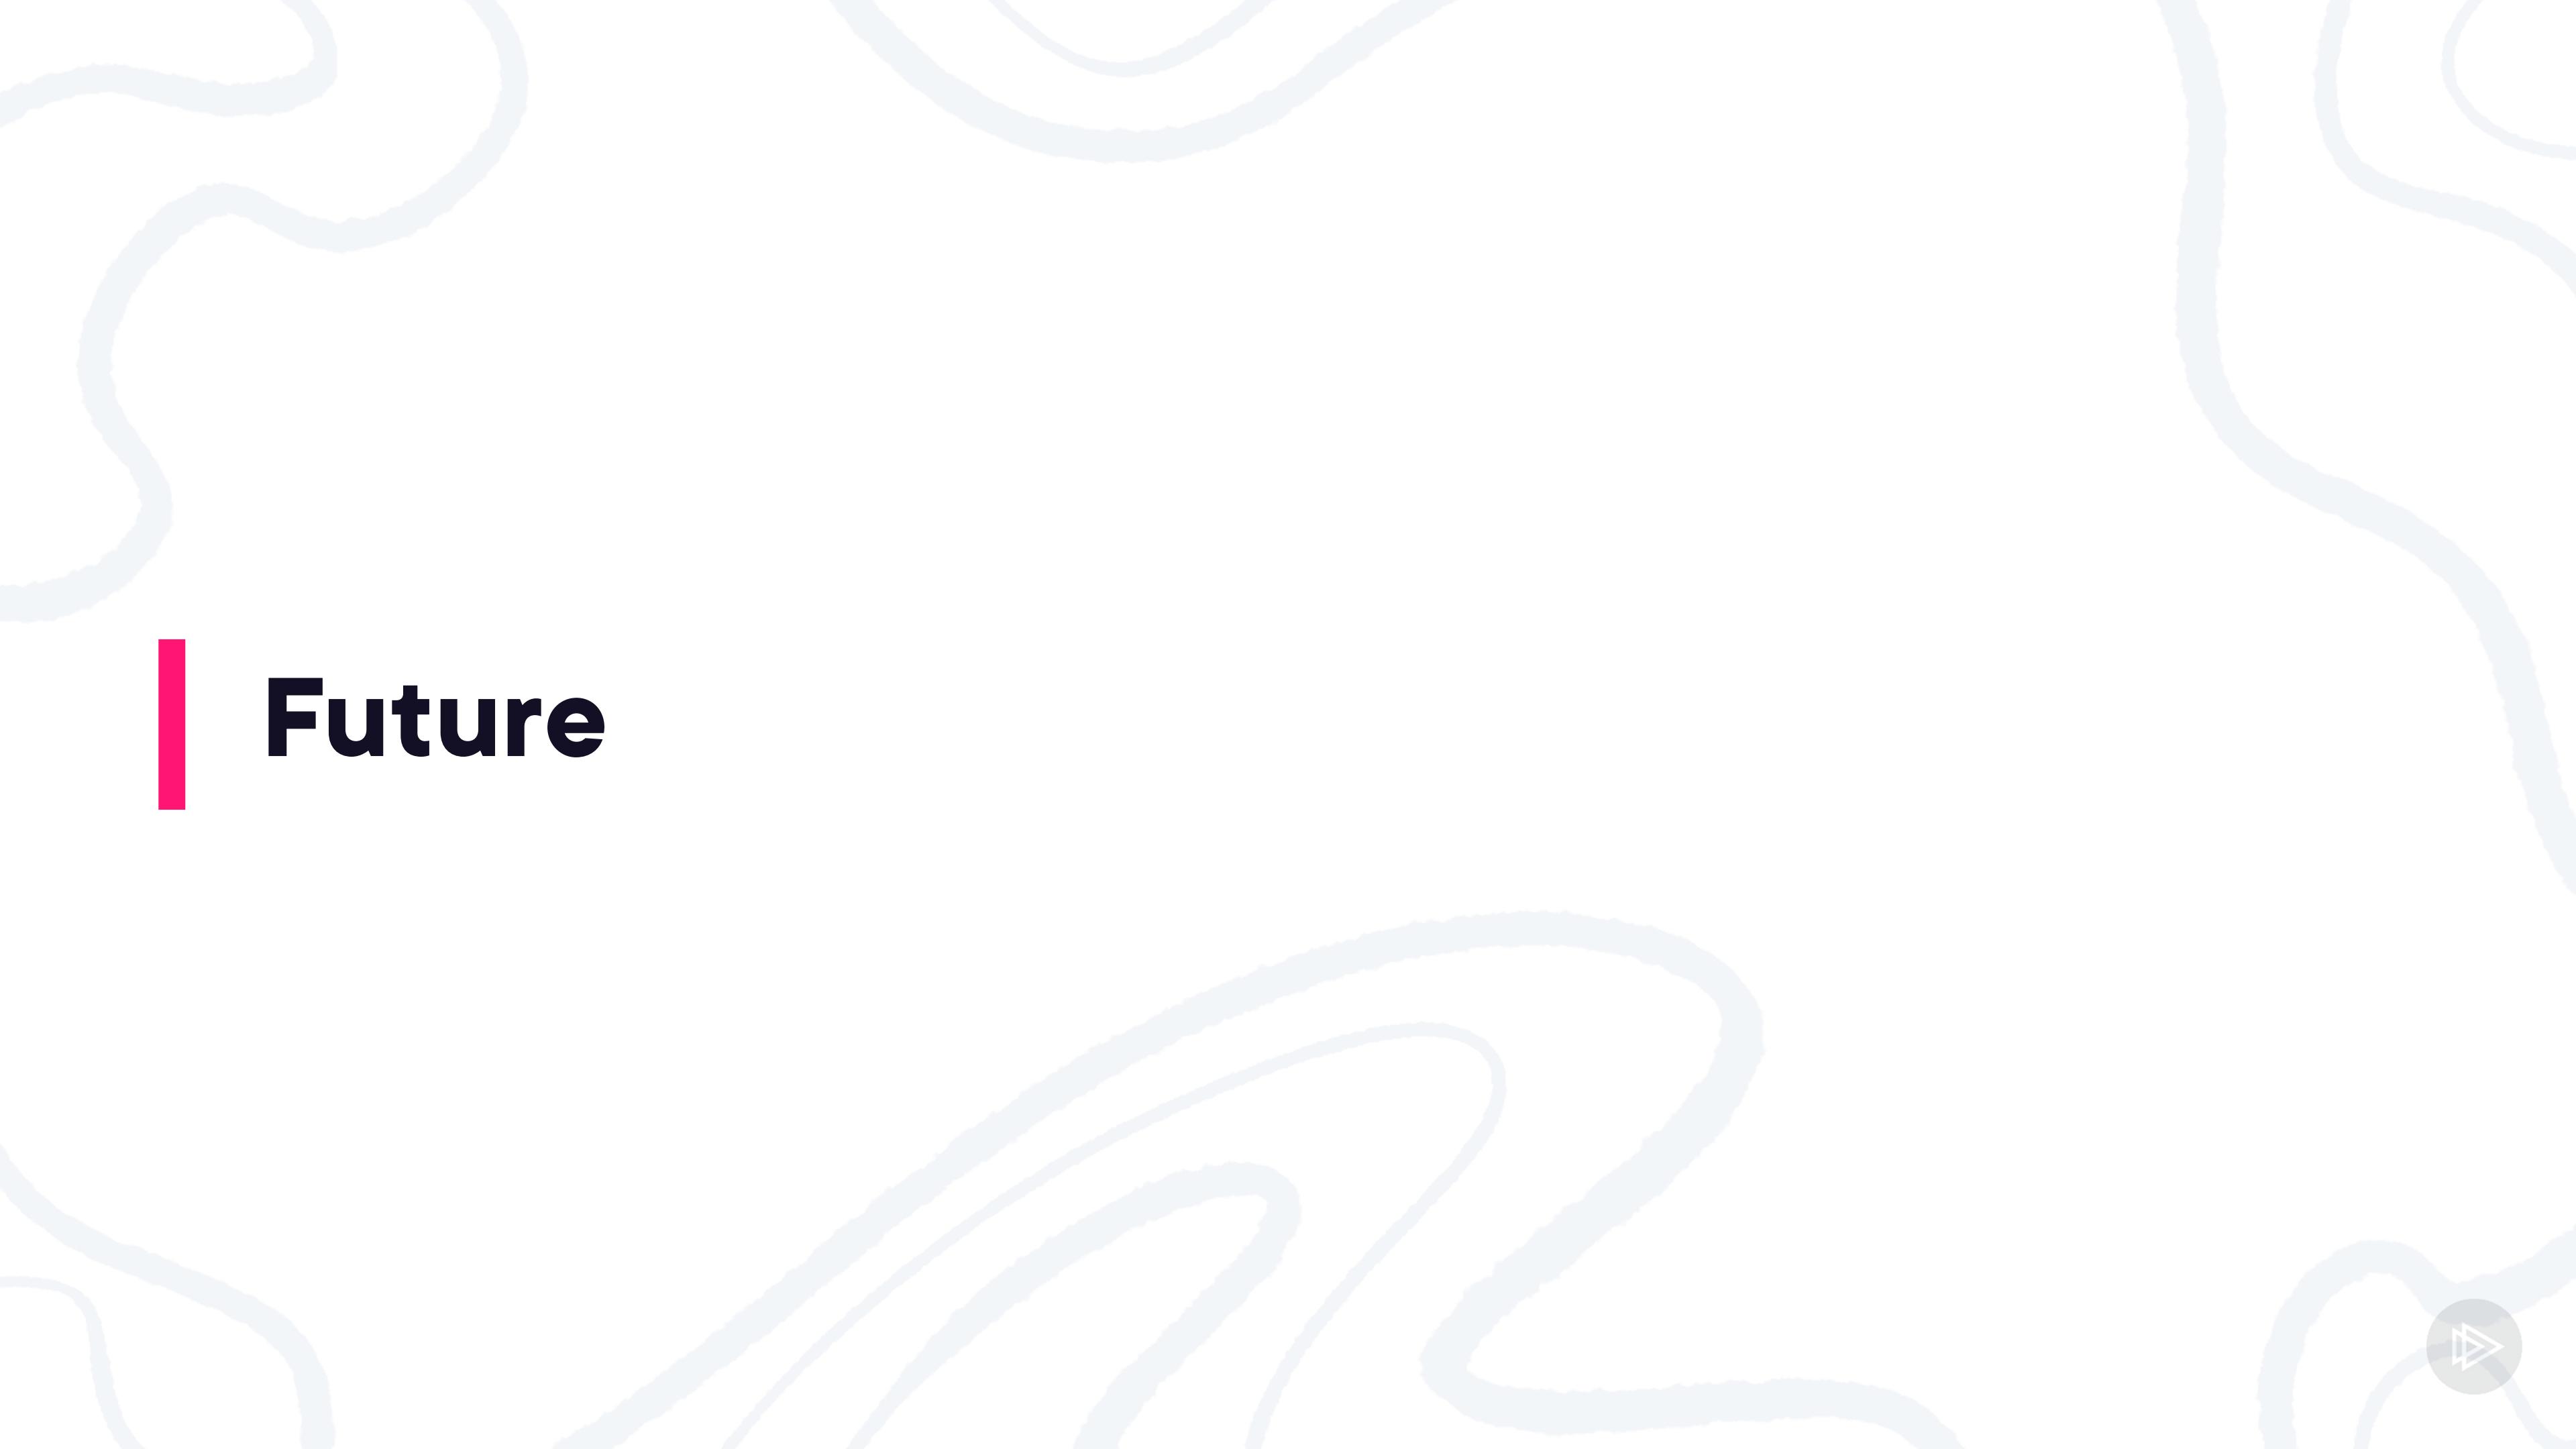

Large company backing

Frameworks vs. libraries

Established track record

Popularity/momentum

| Future

Standalone components

Signals and reactivity

Server-side generation

Developer experience

CLI

Summary

Modern
Performant
Competitive

@josepheames

Thanks
