# Getting Started

**Ajden Towfeek**

DEVELOPER

@ajtowf   www.towfeek.com

# Overview of Tooling

**Visual Studio Code**

**NodeJS**

**TypeScript**

**Angular CLI**

# Angular CLI

**npm install –g @angular/cli**
 – Peer dependency: yarn

**ng new my-app**

**cd my-app**

**ng serve**

# Angular Material

**Install Angular Material and Angular CDK**

"The goal of the CDK is to give developers more tools to build awesome components for the web. This will be especially useful for projects that want to take advantage of the features of Angular Material without adopting the Material Design visual language."

**Angular Team**

# Angular Material

Install Angular Material and Angular CDK

Animations support

Import the component modules

Include a theme

Gesture support

Add material icons

# Summary

**Installed tooling**

 – VS Code, NodeJS, Angular CLI, TypeScript

**Scaffolded an Application**

 – Got started with Angular Material
